Green Vendor Fair: Educational Talks

How Green Is My Town?

Patti Wood, Grassroots Environmental Education
As part of the national launch, Grassroots has issued a 10-Point "Green Town Challenge" to help people test the "greenness" of their towns. Find out how Irvington scored.

"Plastic Beach" This part of the talk focuses on our everyday use of plastic and its environmental impact. Using familiar items as props, we show how typical activities in the life of an average American creates a mountain of plastic waste.

Reducing Energy Consumption

Elizabeth Silleck, NYSERDA

Matt Slattery, Green Star Energy Solutions

Larry Nissman, Phoenix Mechanical

Practical tips on how energy conservation through energy efficient technologies and simple energy-reducing practices in the home can reduce your carbon footprint and lower your monthly bills. Discussion of NYSERDA programs that help homeowners finance home energy assessments and energy efficiency improvements through loan programs and cash back incentives.

Rain Water and Gardening

Anne Marie Mitroff, Groundwork Hudson Valley
A natural way to reduce stormwater pollution & beautify your landscape. This talk will cover rain garden installation basics and why you should consider putting one in your backyard.

Greening Your Home

Norm Jen, Greenergy NY

The greatest environmental impact is in the home's carbon footprint.

What can homeowners do about this? A cost-based approach. From free conservation measures through low cost efficiency all the way to substantial cost efficiency efforts.

Why Your Backyard Matters - Creating a Regional Bioscape

Dr. Fred Koontz, Teatown Lake Reservation

How and why our independent actions can collectively build sustainable, living landscapes at regional scales ("bioscapes") will be explored, including what you can do on your own properties to help make our region more ecologically healthy.

Green Begins at Home

David Singer, Robison's Comfort Save Division
Review the home energy audit process. Basic measures that result in big energy savings and carbon footprint reductions.

Climate Change in the Hudson Hills and Highlands: What Can We Expect?

Teatown Lake Reservation, Dr. Fred Koontz

A brief review of the causes of global warming and climate change, and its worldwide effects on nature. Subsequent discussion will focus on the Hudson Valley, including what we can expect over the next 100 years in our region.

Geothermal Energy

Charles Lazin and Judith Karpova, Altren Consulting and Contracting

Geothermal energy and its applications for heating and cooling. Presentation at 12 noon in the Library, just prior to the Sustainable Architecture Tour (geothermal energy is used in a building on the tour).

NOTE: We would like to thank our exhibitors for participating in this event to offer information to the public. Participation of exhibitors in the Irvington Earth Day 40 Green Vendor Fair does not constitute or imply endorsement of exhibitors or their products or services by the Village of Irvington or its agents. Thanks to all our sponsors for support of this event. Questions or feedback about the fair? Contact Petra Kandus at (914) 316-5200 or earthday40@irvingtonny.gov.
